Baier Marine Company

BACKGROUND

Baier is the first name associated with marine closures, having set the standard for the industry since 1947. L. S. Baier invented and patented the first flush hatch specifically designed for the rigors of the Alaska King Crab fishing fleet, and ever since the company has built and supplied closures to the greater marine industry.

EVOLVING from Baier Hatch Co. In 2007, the company re-incorporated under new ownership as the **BAIER MARINE COMPANY**. We expanded our marine closures line to include multi-bolt manholes, steel hatches, marine steel doors, and we added tug-and-barge grade deck fittings.

ENGINEERED DESIGN

All Baier Marine designs have been engineered to the exacting demands of the commercial marine environment. Baier's world-class manufacturing supply chain provides end-to-end Quality Assurance to deliver the highest quality product to our customers.

AVAILABLE

When you need them, we have them. Whether direct-ship from Baier or available through our network of fine dealers and stocking distributors. We strive to keep a high level of product available in stock throughout our distribution network.

HEADQUARTERED IN USA

Baier's Corporate Office, Engineering, Sales, Logistics and Warehouse operations are located under one roof in **Costa Mesa, California**.

BAIER EQUIPMENT USED WORLDWIDE

Our closures and deck fittings are widely **employed in workboats** around the globe: commercial fishing vessels, tugs, barges, patrol boats, and specialty marine craft in both government and private sectors.

QUALITY MATERIALS

The Baier Flush Hatch product line is available in high-strength **Cast Aluminum** with stainless fittings, as well as cast, heat-treated and hot dip **Galvanized Steel** models. Many models are also available in cast or fabricated **Stainless Steel**.

BROAD PRODUCT LINE

Our quick-open, positive-lock **Flush Hatches** are available in round, oval, and square configurations, with lift-out or hinged options, and a range of pre-cut coaming heights. Economical steel and stainless **Universal Hatches** for barge use come in a range of standard sizes. Our **Multi-bolt Manhole** selection is an unparalleled offering of over 20 models. Fabricated **Marine Steel Doors** come in 22 sizes. We have load-rated **Deck Fittings**: Kevels up to 48" chocks, bitts, double-bitts, eyes, roller buttons, etc – tailored for tug and barge use.

UMC-430

Flush T-Bolt

This industry standard steel enclosure features a proven strongback style design and is operated by a single T-Bolt. Its easy operation facilitates convenient use while maintaining a near flush profile.

Features:

- T-Bolt - Stainless Steel
- Thread Block - Brass
- Strongback - Galvanized Steel
- Gasket - Nitrile Rubber
- Washer - Brass
- T-Bolt Gasket - Nitrile Rubber
- Cotter Pin - Stainless Steel
- Made from high strength 3/8" steel for better impact resistance.
- No tools required, single bolt T-Bolt for secure engagement.
- Stainless steel T-Bolt and Brass Thread block uses dissimilar metals to prevent galling and ensure trouble-free operation.
- Nitrile rubber gaskets ensure water-tight design.
- Meets ABS (American Bureau of Shipping) requirements for design and materials.

Flush T-Bolt hatches are typically found along the gunnels of a barge as well as on the bow/ stern and on top of cargo compartments or tanks. They are used to access wing tanks, the rake compartment, cargo compartments etc. for venting, filling, and inspecting.

Single Bolt Hatches

UMC
MARINE

UMC-540

Raised Single Bolt Hatch

This industry standard steel enclosure features a strongback style design and is operated by a single 7/8" stainless steel bolt. Its easy operation facilitates convenient use while providing a secure hatch.

Features

- Hex Head Bolt - Stainless Steel
- Keeper Chain - Galvanized Steel
- Hinge Pins - Steel
- Cotter Pins - Stainless Steel
- Washer - Brass
- Washer Gasket - Neoprene
- Hatch Gasket - Neoprene
- Meets ABS (American Bureau of Shipping) requirements for design and materials.

Raised single bolt hatches are typically found along the gunnels of a barge as well as on the bow/ stern and on top of cargo compartments or tanks. They are used to access wing tanks, the rake compartment, cargo compartments etc. for venting, filling, and inspecting.

Steel (ASTM A36)
Painted Primer Grey

Stainless steel bolt and steel strongback provide dissimilar metals to prevent galling and ensure trouble free operation.

Neoprene gaskets ensure water tight design.

Galvanized keeper chain ensures covers stay attached and never get lost.

Twist Lock Hatches

UMC
MARINE

Twist Lock Hatch

The Twist Lock hatch is a simple proven design for hatch enclosures. The twist engagement method for securing this hatch makes this the simplest hatch to operate. This hatch is made from high strength cast steel with reinforced ribs. Built-in lift-out handles are molded into the cover plate for convenience. It is available Flush or with a Raised Coaming.

Features

- Gasket - Nitrile Rubber
- Chain - Galvanized Steel
- Coaming (Optional) - Steel

Twist lock hatches are typically found along the gunnels of a barge as well as on the bow/ stern and on top of cargo compartments or tanks. They are used to access wing tanks, the rake compartment, cargo compartments etc. for venting, filling, and inspecting.

UMC-474

Model Number	Part Number	Description	Clear Opening In. (mm)	Weight Total Lbs (Kgs.)	Cutout Dimension in. (mm)
UMC-474	08640-101A	Flush 18" Round Twist Lock Hatch	18.6" (472)	85 (39)	24.75" (629)
UMC-474-5	08641-101A	Raised 18" Round Twist Lock Hatch W/ 5" Coaming	18.6" (472)	118 (54)	24.75" (629)

ASTM A27-70-36 Cast Steel
Painted Primer Grey

High strength cast steel construction.
Lift-out grab handles cast into cover.

Reinforced steel ribs on cover to provide greater impact resistance.
Galvanized keeper chain ensures the cover stays attached and will never get lost.

Material Index:

UMC-615 Quick Acting Hatch

Reliable Access for Demanding Marine Environments

The UMC-615 Quick-Acting Hatch is engineered for vessels that need fast, secure, and watertight access without slowing down operations. It's built for workboats, offshore vessels, military craft, and commercial ships where durability and safety are non-negotiable.

Fast, One-Motion Operation: Crew members can open or secure the hatch in seconds, improving workflow during routine checks, maintenance, or emergency situations.

Watertight Protection: Designed to withstand harsh marine conditions, the UMC-615 maintains a tight seal that protects against water ingress, pressure changes, and rough seas.

Built for Heavy Use: Constructed from marine-grade materials, it resists corrosion, impacts, and long-term exposure to saltwater environments.

Versatile Installation: Ideal for decks, bulkheads, and compartments where quick access is essential—engine rooms, storage spaces, and technical areas.

Safety-Focused Design: The quick-acting mechanism reduces strain on crew members and ensures consistent sealing performance, even in demanding conditions.

Features

- Available in mild steel (Painted zinc primer)
- Also Available in hot dipped galvanized, and all stainless steel construction (special order)
- Custom coaming heights from 8"-24"
- Doors are suitable for a design head of 22" (6706 mm).
- Stainless steel lever mechanism and moving parts.
- 4 dog Quick Acting styles.
- Additional opening dimensions available.
- Other gasket materials available

MODEL	A in. (mm)	B in. (mm)	C in. (mm)	D in. (mm)	Weight Lbs (Kgs)
UMC-615-2424	33.6875 (855.7)	29.25 (742.9)	24 (610)	24 (610)	500 (227)

UMC-615-3636	45.6875 (1160.5)	41.25 (1047.7)	36 (914.4)	36 (914.4)	900 (408)

UMC-551 Flush Watertight Quick Acting Escape Hatch

Low-profile design. High-stakes reliability.

The UMC-551 is engineered for marine environments where rapid, dependable egress is essential. Its flush, unobtrusive profile blends cleanly into decks and bulkheads, while its quick-acting mechanism ensures crews can escape or access critical areas without hesitation.

Fast Emergency Egress: Designed for one-motion operation, enabling crew members to open the hatch instantly during drills or real emergencies.

Flush, Trip-Free Profile: The low-profile design minimizes snag hazards and keeps decks clear, supporting safer movement in tight or high-traffic areas.

Watertight Security: Built to withstand harsh marine conditions, the UMC-551 maintains a robust seal that protects compartments from water ingress, even in rough seas.

Durable Marine-Grade Construction: Resistant to corrosion, impact, and long-term exposure, making it ideal for commercial vessels, offshore craft, and military applications.

Optimized for Escape Routes: Commonly installed in accommodation spaces, machinery rooms, and protected compartments where a secondary exit is required by safety regulations.

Features

- Spring assisted cover for ease of operation
- Knife edge sealing system enables great seal-ability while preventing water from spilling into the clear opening when opening the hatch
- Quick acting design with 3 adjustable dogs for even clamping pressure
- T-Style Slot spindle allows for opening from the topside
- Topside grab handle facilitates easier opening
- Available in mild steel (Painted zinc primer)
- Also Available in hot dipped galvanized, and all stainless steel construction (special order)

Raised 8" and 10" Ullage Hatches

The Ullage hatch is a strong and secure method of enclosing a tank compartment while still providing easy single bolt operation for inspection or measuring of cargo. Available in 8" and 10" diameters.

Features

- Tumble Bolt - Bronze
- Dog Handle - Steel
- Lug Bolt 5/8-11 - Bronze
- Lug Nut 5-8-11 - Stainless Steel
- Washer - Stainless Steel
- Gasket - Nitrile Rubber

Ullage hatches are commonly found welded to the top of a raised watertight hatch or on top of the cargo compartments of tank barges. They are typically used as a vent or an inspection port to measure or verify cargo as well as fill a tank.

Cover: ASTM- A27- 60-30 Cast Steel

Coaming: Steel (ASTM A36)

Painted Primer Grey

Various standard coaming heights available (Custom coaming heights available upon request).

Other gasket material available upon request.

Various hardware options available:

- Steel, Stainless Steel, & Bronze Dog Handles (available with or without grease fittings).
- Bronze & Stainless Steel Tumble Bolts.
- Lug Bolts and nuts made from dissimilar metals to prevent galling and corrosion.

Flame screens available upon request (sold separately).

Raised Watertight Hatches

UMC
MARINE

2-Dog Oval

Raised watertight hatches are strong and secure enclosures designed to be easily accessed when needed. They are universally used on all types of commercial vessels from tank barges, hopper barges, box barges and push-boats to OSVs and larger commercial vessels. Their simple design and quality steel construction help them meet long range trouble-free service requirements in the harshest environments.

Features

- Gasket - Nitrile Rubber
- Removable Hinge Pins
- Available with 12" Coaming & 24" Coaming
- All of our raised watertight hatches meet ABS (American Bureau of Shipping) requirements for design and materials.

Raised watertight hatches are typically found along the gunnels of a barge as well as on the bow/ stern and on top of cargo compartments or tanks. They are used to access wing tanks, the rake compartment, cargo compartments etc. for venting, filling, and inspecting.

Raised Watertight Hatches

UMC
MARINE

3-Dog Round

Raised watertight hatches are strong and secure enclosures designed to be easily accessed when needed. They are universally used on all types of commercial vessels from tank barges, hopper barges, box barges and push-boats to OSVs and larger commercial vessels. Their simple design and quality steel construction help them meet long range trouble-free service requirements in the harshest environments.

Features

- Tumble Bolt - Bronze
- Dog Handle - Steel
- Bolt 5/8-11 - Zinc Plated Steel
- Nut 5/8-11 - Stainless Steel
- Gasket - Nitrile Rubber
- All of our raised watertight hatches meet ABS (American Bureau of Shipping) requirements for design and materials.

Raised watertight hatches are typically found along the gunnels of a barge as well as on the bow/ stern and on top of cargo compartments or tanks. They are used to access wing tanks, the rake compartment, cargo compartments etc. for venting, filling, and inspecting.

Steel (ASTM A36)
Painted Primer Grey

Custom coaming heights available upon request.
Other gasket material available upon request.

Various hardware options available:

- Steel, Stainless Steel, & Bronze Dog Handles (available with or without grease fittings).
- Bronze & Stainless Steel Tumble Bolts.
- Lug Bolts and nuts made from dissimilar metals to prevent galling and corrosion.

Flame screens available upon request (sold separately).

Steel Multi-Bolt Manhole Covers

UMC
MARINE

BMHC BAIER - Clean-Out Hatch - Round 14" &18"

Raised Coaming

The round manholes are also sometimes referred to as clean-out hatches.

Baier's complete line of multi-bolt manholes serves as a great inexpensive option for applications where frequent access is not required. Ideal for tank top covers, fuel and water tank access, inspection access to ship voids, barges, sanitary and digester tanks, clean outs and more. These watertight manholes feature simple designs and utilize high strength steel.

Features:

- High strength carbon steel construction
- Hardware combinations of dissimilar metal prevent galling and corrosion (Not available on all models - see Manhole Matrix for details)
- High-quality neoprene rubber gaskets ensure watertight seal (oil resistant Buna-N Optional)
- Neoprene Gasket material is UV resistant to prevent cracking and memory fatigue
-

Weathertight Doors

UMC-WTD-4D - Weathertight Door - 4 Dog Style

4 Dog Weathertight doors are perfect for easy access to any compartment on your vessel above the waterline. Our doors are fabricated from high quality 1/4" steel plate and feature 4 dogs. They are built to provide continuous trouble-free use. Various standard sizes are available in both right and left hand orientation.

Opening orientation can be determined by standing on the outside of the compartment with the door swinging toward you. Right-handed doors will have the hinges on the right from this perspective. Conversely, a left-handed door will have the hinges on the left.

When Ordering Please Specify:

Clear Opening - 26" x 54" / 26" x 60" / 30" x 60"

Opening Orientation - Left Hand Door / Right Hand Door

Weathertight Doors are commonly found on exterior and interior bulkheads of any vessel.

Material: Steel (ASTM A36)
Finish: Painted Primer Grey

Model Number	Description

Universal Deck Hardware

UMC-460-3 Stainless Steel Fixed Chock

The UMC-460-3 is a robust, polished stainless-steel fixed chock suited for marine mooring operations with 65 ton capacity. It ensures safe and effective handling of large mooring lines while minimizing chafe.

Features

Material & Construction

- Made of 100% stainless steel, engineered for durability and corrosion resistance in harsh sea environments.

Design & Use

- The chock is fixed (non-rotating) and typically mounted on deck. It provides a smooth, high-polish surface to prevent rope wear and reduce friction.
- Compact, low-profile design conserves valuable deck space

Mounting:

- Typically secured to deck structure; trunnion-style or fixed pad installation.

Kevel Chocks | 24", 30", 36", 42", 48" | Cast Steel

UMC offers a wide range of Kevel Chocks for any deck application. Sizes range from 24" long weighing 50lbs to up 48" long weighing 220lbs. Our Kevel Chocks are made from ASTM A27 cast steel and are built to withstand the toughest conditions.

Kevel Chocks are designed primarily to be used with line or wire for barge coupling, checking, or mooring. They are typically placed along the gunnels of a barge or work-boat.

ASTM A27-70-36 Cast Steel

UMC's Kevel Chocks are sold as-cast with no surface paint or finish to maintain quick, easy and safe weld-ability to the deck of any barge or workboat.

Kevels | 12" Small Base | Cast Steel

UMC-K12A

UMC offers a wide range of Kevels for any deck application. Sizes range from 12" long weighing 8lbs to 60" long weighing just under 400lbs. Our Kevels are made from ASTM A27 cast steel and are built to withstand the toughest conditions.

Small Kevels like the UMC-K12A are designed primarily to be used with line for checking, or mooring. They are typically placed along the gunnels of a push-boat/ tow-boat or along a dock.

ASTM A27-70-36 Cast Steel

UMC-SB-8B - 8" Single Bitt, Square Base | Cast Steel

UMC offers a wide range of Single Bitts for any deck application. Our Single Bitts are made from ASTM A27 cast steel and are built to withstand the toughest conditions.

Single Bitts are designed primarily to be used with line or wire for barge coupling, checking, or mooring. They are typically placed at the starboard and port corners of the bow and stern of a barge and along the gunnels of a push-boat/ tow-boat.

ASTM A27-70-36 Cast Steel

UMC's Single Bitts are sold as-cast with no surface paint or finish to maintain quick, easy and safe weld-ability to the deck of any barge or workboat.

Cast Steel

UMC offers a wide range of Double Bitts for any deck application. Sizes range from a minimum bollard diameter of 6" weighing 150lbs up to a bollard diameter of 14" weighing nearly 1600lbs. Our Double Bitts are made from ASTM A27 cast steel and are built to withstand the toughest conditions. Our 8", 10", and 12" models are also available with horns.

Double Bitts are designed primarily to be used with line or wire for barge coupling, checking, or mooring. They are typically placed at the starboard and port corners of the bow and stern of a barge and along the gunnels of a push-boat/ tow-boat. Additionally, the Horns featured on these Double Bitts prevent line or wire from "riding up" the bollard during a tow as well as allow for easy and controlled checking.

ASTM A27-70-36 Cast Steel

UMC's Double Bitts are sold as-cast with no surface paint or finish to maintain quick, easy and safe weld-ability to the deck of any barge or workboat.

Deck Winches

UMC Barge Winches

UMC
MARINE

UMC BC-40 BARGE CONNECTING WINCHES

UMC's barge connecting winches have been trusted across North and South America for decades. Built from premium materials and engineered for long-lasting, trouble-free operation, these winches are purpose-built for secure barge coupling using wire rope. Typically installed on the port and starboard fore and aft barge corners, UMC winches deliver reliable performance in the most demanding marine environments. Contact us today to find the right winch for your specific application.

Features

- Proven 40-ton holding capacity ensures secure barge connections in demanding marine conditions
- Precision double-dog ratchet design delivers industry-leading resolution for superior final tensioning
- Large ratchet lever provides maximum leverage for controlled tensioning
- Hand-operated brake lever allows for smooth, controlled load release
- Hand wheel with spinner knob enables rapid slack take-up and positioning
- Easy-off single fastener hand wheel allows for quick removal and maintenance access
- Front-mounted cable guard ensures proper cable alignment during operation
- Durable machine-cut gearing features a heat-treated steel pinion and cast steel driven gear for long service life
- Bronze shaft bushings provide long-lasting wear resistance and smooth operation
- Easy-access grease zerk fittings allow for convenient lubrication of shaft bushings, dogs, and dog release lever
- Hot-dip galvanized finish provides exceptional corrosion protection in harsh marine environments
- Compact, low-profile design conserves valuable deck space

Right Hand Version Shown Here

- Fully enclosed drum and gearing enhance operator safety and protect components from the elements
- Open-bottom design allows for easy cleanout of debris and water, reducing maintenance downtime

BFHR14 - Flush Deck Hatch | Hex Centerbolt | Round 14" | Aluminum, Steel

The popular "Classic" Baier Flush Hatch™ is the flush-mounted, quick release, lift-out hatch with grab handles as shown. It has long been standard equipment on fish boats, tugs, barges, workboats, and other marine vessels, as well as many U.S. Navy and U.S. and Canadian Coast Guard vessels.

FEATURES

- Cast Hatch Cover
- Cast Strongback
- Stainless Steel Hex Centerbolt and hardware Neoprene Cover Gasket and Washers (Buna-N optional)
- Cast / fabricated matching Deck Ring
- Every unit shipped with an underside escape turning bar for safety (turning wheel optional)
- Detachable Hex wrench used for quick operation, can be stored separately for security

ABS Certified

STRENGTH, SIMPLICITY and SECURITY

The ultimate in strength and simplicity, Baier's original patented strongback system has only two moving parts to secure the hatch cover to the deck. It is superior to other more complicated hatch closure systems in that it is simpler, stronger, more reliably watertight, infinitely adjustable from topside, and more easily serviced (parts are readily available and replaced in the field). Importantly, the recessed hex centerbolt and grab handles offer no snags for nets, lines or hardware.

MATERIALS

The Classic Model BFH hatch product line is available in both cast aluminum and cast steel. Baier is the only company to offer steel hatch covers which is stronger, more durable, and more impact resistant when compared to iron hatches, especially in cold climates. All of our Steel Cover assemblies and deck rings are hot dip galvanized for superior corrosion resistance. The deck ring is available in galvanized mild steel (for welding into steel decks), or cast aluminum (for welding into aluminum decks or bolting to fiberglass or wood decks). Cast stainless steel hatches and fabricated stainless deck rings are available by special order.

BAIER FLUSH HATCH
LIFT-OUT PLAIN DOGGED TYPE
WITH GRAB HANDLES
TYPE "C" POSITIVE LOCKING
MODEL: BFHR24

DWG. NO. 630

BFHO15X24 - Flush Deck Hatch | Hex Centerbolt | Oval 15" X 24" | Aluminum, Steel

The popular "Classic" Baier Flush Hatch™ is the flush-mounted, quick release, lift-out hatch with grab handles as shown. It has long been standard equipment on fish boats, tugs, barges, workboats, and other marine vessels, as well as many U.S. Navy and U.S. and Canadian Coast Guard vessels.

FEATURES

- Cast Hatch Cover
- Cast 3-Arm Strongback
- Stainless Steel Hex Centerbolt and hardware Neoprene Cover Gasket and Washers (Buna-N optional)
- Cast / fabricated matching Deck Ring
- Every unit shipped with an underside escape turning bar for safety (turning wheel optional)
- Detachable Hex wrench used for quick operation, can be stored separately for security

STRENGTH, SIMPLICITY and SECURITY

The ultimate in strength and simplicity, Baier's original patented strongback system has only two moving parts to secure the hatch cover to the deck. It is superior to other more complicated hatch closure systems in that it is simpler, stronger, more reliably watertight, infinitely adjustable from topside, and more easily serviced (parts are readily available and replaced in the field). Importantly, the recessed hex centerbolt and grab handles offer no snags for nets, lines or hardware.

MATERIALS

The Classic Model BFH hatch product line is available in both cast aluminum and cast steel. Baier is the only company to offer steel hatch covers which is stronger, more durable, and more impact resistant when compared to iron hatches, especially in cold climates. All of our Steel Cover assemblies and deck rings are hot dip galvanized for superior corrosion resistance. The deck ring is available in galvanized mild steel (for welding into steel decks), or cast aluminum (for welding into aluminum decks or bolting to fiberglass or wood decks). Cast stainless steel hatches and fabricated stainless deck rings are available by special order.

T-Handle Strongback Flush Hatches

70°
(508mm)

BFHRTH8 - Flush Hatch | Pull-up T-Handle | Round 8" | Aluminum

This popular strongback hatch design series adds the convenience of a built-in recessed Stainless Steel T-handle to the flush-mounted, quick release, lift-out hatch. The design is especially popular on aluminum boats, fishing and other workboats, as well as many U.S. Navy and U.S. and Canadian Coast Guard vessels.

FEATURES

Unique:

- Cast Hatch Cover (unique no grab handles)
- Stainless Steel Centerbolt and hardware
- Built-in Stainless Steel T-Handle used for quick engagement as well as lifting
- Turning wheel optional

Shared With Classic HEX-Bolt Series:

- Cast Strongback
- Cast / fabricated matching Deck Ring
- Neoprene Cover Gasket and Washers (Buna-N optional)
- Every unit shipped with an underside escape turning bar for safety

STRENGTH, SIMPLICITY and CONVENIENCE

The T-Handle Strongback system has only three moving parts to secure the hatch cover to the deck. Like the Classic HEX it is simple, strong, reliably watertight, infinitely adjustable from topside, and easily serviced (parts are readily available and replaced in the field).

MATERIALS

The T-Handle Strongback hatch cover product line is available only in cast aluminum. The deck rings used are the same as the Classic HEX and are available in galvanized mild steel (for welding into steel decks), or cast aluminum (for welding into aluminum decks or bolting to fiberglass or wood decks). Stainless deck rings are available by special order.

1800-4

BFHQTH20 - Watertight Flush Hatch | Quick Acting | Round 20" | Aluminum

These light-weight, quick-acting 4-dog models are ideal for high-traffic closures where speed and ease are paramount, and/or where positive engagement must be visually verifiable at a glance. The design is especially popular on aluminum boats, fishing and other workboats, as well as many U.S. Navy and U.S. and Canadian Coast Guard vessels.

FEATURES

Unique

- Adjustable Dog Tensioners that provide equal tension on all points ensure a water-tight seal
- Built-in "Never Lose" handle
- A simple 1/8th-turn of the handle provides smooth, easy and secure engagement
- Thicker Dog Arms for superior strength
- Positive visual verification: When the handle is down, the hatch is secured
- Inside escape bar on all units (optional inside turning wheel available)
- Subtle design improvements make the BFHQ stronger, more watertight than our competitors' similar units

Shared With Classic HEX-Bolt Series:

- Cast from high-grade corrosion-resistant 356 aluminum alloy (ASTM B26)
- Maximum durability, stronger deck strength and impact resistance
- Stainless steel T-handle and operating hardware
- Dissimilar metals isolated by neoprene and nylon

WATERTIGHT

- Machined surfaces and superior casting processes control tolerances
- Neoprene cover gasket and sealing ring ensure tight seal

BFHQTH20A/A with Cast Aluminum Deck Ring

MATERIALS

Currently, the 4-dog BFHQ series hatch cover assemblies are available only in cast aluminum. However, the deck rings for the BFHQ are the same size as the Strongback models, and are available in galvanized mild steel or cast aluminum. Stainless Steel deck rings are available by special order.

This hatch is ABS Certified for use on ABS classed vessels or facilities by the American Bureau of shipping.

BAIER FLUSH HATCH
LIFT-OUT MULTI-DOGGED TYPE
WITH BUILT-IN T-HANDLE
TYPE "D" QUICK ACTING
POSITIVE LOCK
MODEL BFHQTH20

DWG. 08864-105

BFHQTH15X24 - Watertight Hatch | Quick Acting | Oval 15" X 24" | Aluminum

These light-weight, quick-acting 4-dog models are ideal for high-traffic closures where speed and ease are paramount, and/or where positive engagement must be visually verifiable at a glance. The design is especially popular on aluminum boats, fishing and other workboats, as well as many U.S. Navy and U.S. and Canadian Coast Guard vessels.

FEATURES

Unique

- Adjustable Dog Tensioners that provide equal tension on all points ensure a water-tight seal
- Built-in "Never Lose" handle
- A simple 1/8th-turn of the handle provides smooth, easy and secure engagement
- Thicker Dog Arms for superior strength
- Positive visual verification: When the handle is down, the hatch is secured
- Inside escape bar on all units (optional inside turning wheel available)
- Subtle design improvements make the BFHQ stronger, more watertight than our competitors' similar units

Shared with Classic Hex-Bolt Series

- Cast from high-grade corrosion-resistant 356 aluminum alloy (ASTM B26)
- Maximum durability, stronger deck strength and impact resistance
- Stainless steel T-handle and operating hardware
- Dissimilar metals isolated by neoprene and nylon

WATERTIGHT

- Machined surfaces and superior casting processes control tolerances
- Neoprene cover gasket and sealing ring ensure tight seal

BFHQTH15X24A/A with Cast Aluminum Deck Ring

MATERIALS

Currently, the 4-dog BFHQ series hatch cover assemblies are available only in cast aluminum. However, the deck rings for the BFHQ are the same size as the Strongback models, and are available in galvanized mild steel or cast aluminum. Stainless Steel deck rings are available by special order.

This hatch is ABS Certified for use on ABS classed vessels or facilities by the American Bureau of shipping.

BFHHQTH24X24 - Internal Hinge Watertight Hatch | Quick Acting | Square 24" X 24"

Aluminum

These light-weight, quick-acting 4-dog models are ideal for high-traffic closures where speed and ease are paramount, and/or where positive engagement must be visually verifiable at a glance. The new Baier™ Hidden-Hinge, fully-articulated commercial marine flush deck hatch assembly for workboats adds the convenience of a built-in recessed Stainless Steel T-handle to the flush-mounted, quick release, lift-out hatch. The design is especially useful for aluminum boats, crew supply vessels (CSV), fishing vessels and other workboats, as well as many U.S. Navy and U.S. and Canadian Coast Guard vessels. This new hinge assembly works exceeding well when installed vertically like a door -- it pivots easily and maintains alignment. An over-center auto stop holds cover securely open at 120 degrees, and the hatch cover slides further open to over 180 degrees.

FEATURES

- Opens to 180 degrees-plus
- Over-center auto stop holds cover securely open at 120 degrees
- Auto-stop releases quickly with a push-lever
- Stainless hardware, Delrin slides
- Works equally well in flush deck or vertical mount positions – perfect for a lazarette hatch-door
- Thicker Dog Arms for superior strength
- Positive visual verification: When the handle is down, the hatch is secured
- Inside escape bar on all units (optional inside turning wheel available)
- Subtle design improvements make the BFHQ stronger, more watertight than our competitors' similar units

Shared With Classic HEX-Bolt Series:

- Available in 20" Round, 15" X 24" Oval or 24" x 24" Square
- Available with aluminum or galvanized steel deck ring

MATERIALS

Currently, the 4-dog BFHQ series hatch cover assemblies are available only in cast aluminum. Deck rings are available in galvanized mild steel or cast aluminum. Stainless Steel deck rings are available by special order.

This hatch is ABS Certified for use on ABS classed vessels or facilities by the American Bureau of shipping.

Low Profile Quick-Acting Hatches

BFHLP20 - Watertight Hatch | Low Profile, QuickActing | Round 20" | Aluminum

These light-weight, quick-acting 4-dog models are ideal for high-traffic closures where security and ease are paramount, and/or where positive engagement must be visually verifiable at a glance. Baier™ low profile hatches are designed for applications where inside clearance is limited. Built strong for the extreme rugged requirements of the commercial and fast utility craft worldwide.

FEATURES

Unique

- The low-profile unit on right is only 2.62 inches high, top to bottom!
- 4-dog, center cam actuation. Clamping pressure across 4 points of contact
- Center cam, when not engaged, pops up as visual indicator that hatch is not secured
- When engaged, cam unit is completely flush – no snags.

Shared With Classic HEX-Bolt Series:

- Each Baier Low Profile hatch assembly also includes an optional Drive Adapter puck which converts the hexagonal drive so hatch can be operated with any standard half inch (12.7mm) socket drive
- Built-in underside escape handle
- Drop-in replacement for standard 20" deck rings
- Cast from high-grade corrosion-resistant 356 aluminum alloy (ASTM B26)
- Secured hatch opens with standard 1 3/4" hex marine t-handle tool
- Adapter for standard 1/2" socket wrench included
- Maximum durability, stronger deck strength and impact resistance

MATERIALS

Currently, the 4-dog BFHLP series hatch cover assemblies are available only in cast aluminum. However, the deck rings for the BFHLP are the same size as the Strongback models, and are available in galvanized mild steel or cast aluminum. Stainless Steel deck rings are available by special order.

This hatch is ABS Certified for use on ABS classed vessels or facilities by the American Bureau of shipping.
